Author and Subject Index

PCI JOURNAL, Volume 29, 1984

The following is an index of all reports, papers, architectural/technical features, and discussions which have appeared in the PCI JOURNAL during the past year. This index is the third supplement to the recently published PCI JOURNAL 25 Year Index which comprehensively references all articles published in the JOURNAL from V. 1, No. 1, 1956 through V. 26, No. 6, 1981.

Listed first is the author index which includes, in alphabetical order, the names of all contributing authors for 1984, followed by the title, volume number, date of publication, and page numbers for each report, article, etc.

The material is then classified in chronological order under various subject categories. Depending on their scope, some articles are listed under more than one heading.

Many recent back issues of the PCI JOURNAL are still available. In addition, several of the more important articles are available in reprint form. In cases where individual reprints are unavailable, copies of articles can be obtained at cost of reproduction.
